HURST

MANUFACTURING COMPANY

Providing
cost-effective,
eco-friendly
solutions
for your
shipping needs.

Corrugated ALL CORR Pallets

The **ALL CORR Pallet** is custom manufactured using only corrugated materials. Our pallet offers low cost shipping and packaging solutions that minimize wasted resources. The **ALL CORR Pallet** design allows for more product to be added to transport loads for incredible savings in Less Than Load (LTL) shipments, and each pallet can be recycled to reduce the environmental impact of doing business.

International Shipping

ALL CORR Pallets are ISPM 15 compliant and meet all international shipping guidelines. Additionally, since there's no wood that can carry pests, the corrugated pallets spend less time in Customs.

Eco-friendly

Corrugated **ALL CORR Pallets** are made from post consumer waste and are 100% recyclable. The product has no landfill cost or environmental impact.

Lightweight

The 48" x 40" standard **ALL CORR Pallet** only weighs 8 pounds, which saves money on shipping and is ideal for LTL shipments. Corrugated pallets mean more product/revenue per load and less overall truckload costs.

Fully Customizable

Hurst Manufacturing designs and engineers each **ALL CORR Pallet** to meet your company's shipping needs.

Safety

The **ALL CORR Pallet** is employee friendly. No nails, staples or splinters that can cause injuries.

Overall Cost

Using **ALL CORR Pallets** can help you save on freight, disposal, personnel injury and inventory shrinkage.

ALL CORR Pallet VS Conventional Wood Pallet

	ALL CORR Pallet	Wood Pallet
Enviromental	Made of up to 70% recycled corrugated material and is 100% recyclable.	Millions of old pallets end up in landfills every year.
Infestation	Will not attract and is not a host for wood boring parasites. Exempt from ISPM-15 International regulations.	Known to host Asian Longhorned Beetle, Asian Cerambycid Beetle, Pine Wood Nematode, Pine Wilt Nematode, Anoplophora Glabripennis and many other pests.
Weight	From 5 – 12 lbs, with a standard 48" x 40" GMA pallet weighing only 8 lbs.	Average of 45 lbs for a standard 48" x 40" pallet and can weigh as much as 65 lbs.
Safety	Light weight makes it safer for workers to lift. No nails, staples or splinters make it safer for consumers.	US companies pay millions a year to settle litigation claims related to wood pallets.
Market Acceptance	Meets all OSHA and international shipping regulations. Accepted by countries and companies that prohibit wood pallets. Considered sterile and accepted inside food processing and pharmaceutical plants.	Prohibited by certain companies and countries for safety and sanitary reasons. Subject to import and export regulations. Prohibited in sterile environments.
